## **DETAILED ACTION**

## Specification

The abstract of the disclosure is objected to because of the use of reference numbers. While such numbers are common in PCT applications, U.S. applications typically do not have element numbers. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

Page 1, line 26: Change "has been becoming" to -- has become --.

Page 8, line 15: Change "while attenuates" to -- while attenuating --.

Page 8, line 20: Change "Joule heat" to -- Joule heating --.

Page 8, line 23: Delete "a matter such that"

Page 8, line 24 Change "is shortened" to -- to be shortened --.

Page 9, line 12: Change "more concrete" to -- this case --.

Appropriate correction is required.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

## Allowable Subject Matter

Claims 1-6 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the references of record neither reveal nor render obvious the recited combination including a noise filer for attenuating AC currents and passing DC currents comprising first and second conductors coupled to first and second anodes and dielectric layers in the claimed manner.

Art Unit: 2819

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,714,427 to Barthold describes thermal limits for current carrying transmission lines. U.S. Patent 6,314,008 to Bao et al presents a filter having both AC and DC blocking means. U.S. Patent 5,500,629 to Meyer provides a noise suppressor for transmission lines. U.S. Patent 3,453,564 to Russell discloses a transmission line attenuator providing a DC short circuit and an AC open circuit.

This application is in condition for allowance except for the following formal matters:

- 1) Amend the abstract.
- 2) Amend the specification.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
